Information Disclosure Statement

Commissioner of Patents and Trademarks
Washington, District of Columbia 20231

Sir:

Attached is a completed Form PTO-1449 and copies of the pertinent parts of the references cited thereon.
Following are comments on these references pursuant to Rule 9B:

Mead shows capacitive spheres comprising a means to energize his ZPE converter
Grumman's X-29a shows canard wing-lets, swept forward wings and a hyperbolic curve disposed there in the wing.
Tornado Air Management Systems shows a swirl vane

None of the references shows an Implosion Propulsion System for converting Electro-Vortex energy into a propulsion system.

To the contrary all of the references show technologies with inherent drag and lack an understanding of using the shape of the device as a motor. The air, water electromagnetic spectrum and the vacuum energy of space may be used as a propellant provided the shape and composition of the device is conducive to Implosion.

Also none of the references show any indication toward true vortex amplification devices or the building blocks of superconductivity, they are simply individual inventions verses the methodology encompassed by this applications article.

Very respectfully

Robert A. Patterson
